HAMPTON INSTITUTE

A GLIMPSE OF MEMORIAL CHURCH

This is the center of the religious life of Hampton Institute. Workers and students may join Memorial Church by Association on statement of their membership in other churches.

OGDEN HALL

This auditorium is in constant use for evening prayers, school assemblies, and community gatherings. Here the Negro spirituals are sung every Sunday evening by the entire school and here are also given Anniversary and Commencement programs, concerts, lectures, plays, and moving pictures.

CLARKE HALL, THE Y. M. C. A. CENTER

Clarke Hall is the indoor recreation center for the young men. It is also used for Y. M. C. A. meetings, conferences of various kinds, and small social gatherings. The Y. W. C. A. has rooms in Winona Lodge for similar purposes.

THE ANNIVERSARY MARCH TO DINNER

The anniversary of the founding of the school in 1868 is celebrated in April of each year. Public exercises and the regular school activities attract many visitors from both North and South, including a large number of alumni.

THE SCHOOL BATTALION

All the young men of the school are under military discipline, which helps to develop promptness, alertness, self-control, endurance, and respect for authority. The battalion includes a unit of the Reserve Officers' Training Corps in charge of a United States Army officer with student line officers.

AN INTERCLASS HOCKEY GAME

The young women have their own physical director who, with her assistants, directs their hikes and their hockey, volley-ball, basketball, tennis, and baseball games. This course helps to develop self-discipline, self-control, and self-respect.

A SWEDISH FOLK DANCE

The young women have instruction in marching, gymnastics, apparatus, games, folk dancing, and corrective work. A physical-education demonstration, in which both young men and women take part, is held each spring.

HUNTINGTON MEMORIAL LIBRARY

The library, containing 55,000 volumes, is in constant use by the school and community. It is rich in books of reference for the various departments of the Institute. It has also many pictures for special exhibits.

THE READING ROOM

The reading room offers a much appreciated opportunity to obtain general information. It receives regularly 103 daily and weekly newspapers and 135 magazines. The librarian issues a weekly bulletin calling attention to new books and interesting magazine articles.

A TRACK MEET ON ARMSTRONG FIELD

Armstrong Field was the gift of Hampton's alumni. On it the young men compete in interclass and intercollegiate football and baseball games and in track meets. Cook of Union is winning the 220-yard dash.

THE CHAMPION BASKETBALL TEAM (1925)

For the past two seasons the Hampton basketball team has held the championship in the Colored Intercollegiate Athletic Association. Each class also has its basketball team and interclass contests are held.

SCENE FROM "OEDIPUS"

Hampton Institute has two dramatic clubs that have for their purpose the education of the student body in worth-while plays and the training of their members not only in acting but in scene construction and costuming.

THE HAMPTON INSTITUTE GLEE CLUB

Students gifted musically enjoy unusual opportunities in the glee clubs, bands, and choir. Concerts have been given by this Glee Club in Richmond, Norfolk, Baltimore, Philadelphia, and New York.

MEMBERS OF THE SCHOOL HERD

These cows are typical of those found in the school herd. They provide the necessary material for class work in feeding and judging dairy cattle and in the management of the herd.

A POULTRY PROJECT

An agricultural "project" is an enterprise in crops or live-stock in which the student himself, under direction, makes the necessary investment, keeps accounts of costs and sales, and makes or loses on his venture.

PRACTICAL EXPERIENCE IN PRUNING

Classroom instruction, of standard, four-year college grade, is supplemented by practical experience in all kinds of agricultural and demonstration work.

CHEMISTRY CLASS STUDYING SOILS

The chemical laboratory is well equipped and offers opportunity for the analysis of soils, fertilizers, feeds, and plant products. There are also special laboratories for Physics and Biology.

TEA AT THE PRACTICE HOME

The Practice Home gives groups of young women experience in home making under the direction of a resident teacher.

PLANTING BULBS FOR SPRING FLOWERING

One of the aims of the Practice Home is to teach young women the principles of home gardening and to develop in them an appreciation of beauty brought to the home through ornamental planting.

A STUDENT TEACHING UNDER SUPERVISION

Personal conferences between staff teacher and cadet-teacher precede and follow each lesson. Practice-teaching is done in the high-school classes in the Academy and in the elementary-school classes in the Whittier Training School.

FUTURE TEACHERS OF HOME ECONOMICS

These young women are graduates of accredited high schools and are enrolled in the two-year teacher-training course in the School of Home Economics.

LUNCH HOUR AT THE WHITTIER SCHOOL

Students in the School of Home Economics of the Teachers College have the experience of assisting in the preparation and serving of the hot noon lunch at the Training School.

A COLLEGE CLASS IN GENERAL BIOLOGY

The Biological Laboratory aims to give a general knowledge of the principles of plant and animal life, as well as the essentials of human physiology and hygiene. Plant breeding, diseases, and nutrition are the subjects studied.

**A CADET-TEACHER WORKING OUT A "PROJECT"
WITH AN UNGRADED GROUP**

Those students in the School of Education who are preparing to teach in primary and grammar grades do their practice-teaching at the Whittier Training School of 400 pupils in classes from the kindergarten through the eighth grade.

A GROUP OF COLLEGE STUDENTS

These students are grouped on the porch of the latest dormitory—Kennedy Hall—which is occupied by some of the women of the group. The dormitory was built by students of the Trade School.

EDITORIAL STAFF OF THE "STUDENT"

"The Student" is a monthly publication issued by the alumni and the student body, and is devoted to their literary, dramatic, athletic, and other activities.

JEANES TEACHERS AT THE SUMMER SCHOOL

This group of Jeanes teachers attended a session of the Summer School to take courses arranged especially to meet their needs. These industrial teachers supervise the work of Negro rural schools throughout the South.

TRAINING IN BUSINESS PRINCIPLES

Weekly lectures are given before the students in the School of Business by men and women of wide experience in various lines of business.

BUSINESS STUDENTS AND GRADUATES IN THE TREASURER'S OFFICE

Practical experience in modern office methods is obtained in the various offices of the Institute. The need for men and women with such training is increasingly urgent in Negro business enterprises.

PRACTICAL INSTRUCTION

All tradesmen receive training on practical work as far as possible. The size of the class is determined by the amount of practical experience available.

PRESS ROOM OF THE PRINTING DEPARTMENT

The catalogue and this pamphlet are products of this department. Students have abundance of practical experience in a large variety of job work and in publishing illustrated bulletins and pamphlets, as well as a monthly magazine.

A CLASS IN DRAFTING

Drafting is an essential part of many trades and sufficient is given to enable the student to read the literature of his trade and to lay out and plan his work intelligently.

TEST OF ROOF FRAMING IN THE LABORATORY OF BUILDING CONSTRUCTION

Students in the building trades and in the advanced Builders' Course are given instruction in testing materials and in methods of construction pertaining to their particular work.

CLASS IN ART APPRECIATION

For the sake of cultivating their artistic taste students are taught the principles of design and are given a short course in the history of art.

HIGH-SCHOOL CLASS IN PHYSICS

The experimental method is followed in teaching the Physics, Chemistry, Biology, and General Science offered in the curriculum of the Academy, which is a standard four-year high school.

A DORMITORY FOR YOUNG MEN

James Hall, a fireproof building erected by students of the Trade School, is the most recent of the dormitories for young men. An interclass track and field meet is shown in the picture.

IN THE STUDENTS' DINING-ROOM

Sitting together at meals helps to develop good table manners as well as good fellowship. Social gatherings are held at various times during the year under the supervision of the Dean of Women.

This view of Hampton Institute from the air shows also, in the background, the buildings of the National Soldiers' Home, and in the distance Fort Monroe and Old Point Comfort. In the immediate foreground are wharves of the town of Hampton.
